SUMMARY

Full Stack Developer with a strong academic background in Software Engineering from the University of Science and Technology. Experienced in designing and developing web applications using C#, .NET Core, ASP.NET MVC, and REST APIs, with hands-on experience building scalable and responsive systems using modern web technologies.

Passionate about building clean, maintainable, and user-centred applications, with a strong ability to translate business requirements into technical solutions in collaboration with stakeholders and cross-functional teams.

Continuously improving skills in Blazor, Entity Framework Core, SQL databases, and frontend technologies (HTML5, CSS, JavaScript), with exposure to cloud concepts and modern development practices.

PROJECTS

- **Enterprise Medical Management System | Full Stack Developer**
- Designed and developed a scalable medical management platform using C#, ASP.NET MVC, SQL Server, Entity Framework Core, and responsive frontend technologies.
- Implemented modules for patient registration, doctor scheduling, appointments, billing workflows, and role-based dashboards for Admin, Doctor, and Patient users.
- Resulted in a 45% faster appointment management workflow and significantly reduced manual administrative tasks through automation.
- Built with modular architecture to support future expansion such as telemedicine, notifications, and analytics dashboards.
- **HRMS – Human Resource Management System | Full Stack Developer**
- Engineered a complete HR management solution for employee records, leave requests, payroll-system, and permissions management using .NET Core, REST APIs, SQL Server.
- Integrated secure authentication, role-based authorization, and centralized admin controls.
- Improved HR process efficiency by 50% through digitization of employee operations and reduction of repetitive paperwork.
- Designed the system with maintainable code structure for enterprise growth and future integrations.
- **Administrative Dashboard & Role Permission Platform | Full Stack Developer**
- Developed a modern admin dashboard using HTML5, CSS3, JavaScript, Bootstrap, ASP.NET MVC for managing users, permissions, and internal workflows.
- Implemented multi-role access control.
- Focused on user experience, responsive design, and high maintainability.
- **E-Commerce Web Application | Full Stack Developer**
- Built a responsive online shopping platform featuring product, cart, discount engine, customer accounts, and order workflows using C#, ASP.NET, SQL Server, JavaScript.
- Integrated clean UI/UX principles and optimized page loading performance.
- Prepared architecture for payment gateway and shipment integrations.

EDUCATION

Bachelor's Degree in Software Engineering

Jordan University of Science and Technology

PROFESSIONAL EXPERIENCE

Full Stack Development Trainee | Tahaluf AI Emarat Technical Solutions

Completed intensive full stack development training focused on building modern web applications using **C#, .NET Core, ASP.NET MVC, SQL Server, HTML, CSS, JavaScript, and REST APIs**.

Developed practical skills in backend architecture, database design, authentication systems, and frontend integration.

Worked on real business scenarios involving CRUD systems, role-based access control, API consumption, and responsive UI development.

Strengthened problem-solving abilities, debugging techniques, clean code practices, and scalable application design.

Frontend Development Trainee | Classera

Completed specialized frontend training focused on building modern, responsive, and user-centered web interfaces.

Designed and developed a complete **Admin Dashboard Project** from scratch using **HTML5, CSS3, JavaScript, Bootstrap**, and modern UI/UX principles.

Implemented analytics cards, charts, tables, filtering systems, and responsive layouts optimized for desktop and mobile devices.

Enhanced skills in visual design, user experience, component organization, and professional dashboard structures.

Full Stack Development Trainee | Nextwo

Participated in advanced full stack development training covering enterprise web application workflows and production-ready coding practices.

Built and delivered a final **HRMS (Human Resource Management System)** using **ASP.NET MVC / .NET Core, SQL Server, Entity Framework Core**.

Implemented employee management, attendance workflows, leave requests, user roles, and centralized admin controls.

Improved expertise in business systems development, database relationships, layered architecture, and secure authentication systems.

Flutter Development Trainee | Dot

Completed hands-on mobile app development training using **Flutter** and **Dart** for cross-platform applications.

Learned state management concepts, responsive mobile UI design, API integration, navigation systems, and reusable widgets.

Developed a final **Food App** integrated with APIs for dynamic product listing, categories, and user interaction flows.

Strengthened mobile development skills, clean UI implementation, and modern app performance practices.
